

## New assignments – new solutions: our product lines

As one of the leading manufacturers, we set the standard: whether chemically, thermally, mechanically bonded, whether impregnated, lined or laminated, whether in rolls or cut to size – TWE Dierdorf nonwovens cover a wide range of different products with defined material properties.

At the same time we develop nonwovens offering special properties together with our customers who represent nearly all industrial branches: ideas, impulse and innovations for a material with unlimited possibilities.

### ParaMoll®
